Dear Sir,

Thank you for your letter of 30th November addressed to the Chief Engineer, Lisnagarvey and which has been forwarded to this department for reply.

We have two stations operating on 1340 kc/s, at Lisnargarvey with a 100 kW and at Londonderry with a 0.25 kW, so it would seem that you did indeed receive transmissions from the first station. On the other hand it is more difficult to say which of our 1546 kc/s transmitters you received at the same time. We have several transmitters operating with 1 kW on 1546 kc/s at Brighton, Fareham, Leeds, Liverpool, Plymouth, Preston, Redruth and Swansea and a number of 0.25 kW transmitters in addition.

We regret we do not keep records of other reports of long distance reception but trust that this letter will answer your enquiries.

Yours faithfully,

M B Stanger

(MB. Stanger)
